

Standard Operating Procedures (SOP): Logistics Emergency Management

Target Region: North Eastern Region (NER), India

1. Incident Response Framework

In the event of a road accident, breakdown, or safety hazard in the NER terrain, the driver must execute the following sequential steps immediately:

- **Step 1: Secure the Vehicle & Scene** - Pull over to the safest available spot (avoiding blind curves). Turn on hazard indicator lights immediately.
- **Step 2: Deploy Warning Devices** - Place reflective triangles at least 50 metres behind the vehicle on mountain roads, and 100 metres on open highways (NH-27).
- **Step 3: Conduct Initial Assessment** - Check for injuries. If casualties are present, prioritize medical aid. Check for fuel leaks or hazardous material spills.
- **Step 4: Initiate Emergency Communications** - Contact the centralized fleet control room and regional helpline numbers immediately with exact GPS coordinates or highway milestone references.

2. Terrain & Weather Specific SOPs

The North Eastern Region presents unique seasonal hazards requiring specific operational responses:

Hazard Event	Immediate Driver Action Protocol
Landslide / Mudslide	Do not attempt to cross moving debris. Reverse vehicle to a stable rock-face zone. Avoid parking directly beneath loose soil slopes.
Flash Floods	Park on elevated highway stretches. Never attempt to drive through water logged sections where the roadbed visibility is compromised.
Dense Fog (High Altitude)	Reduce speeds below 20 km/h. Activate fog lights and tail lights. Utilize the road's painted edge lines (cat's eyes) as orientation guides.

3. State Emergency Control Rooms

For localized assistance, clear communication lines must be established with state authorities:

State	Primary Control Center / Helpline
-------	-----------------------------------

Assam	100 / 112 (Dispur Control Room / State Disaster Response)
Arunachal Pradesh	0360-2244265 (Itanagar Central Control)
Meghalaya	0364-2222244 (Shillong Emergency Operations)
Sikkim	03592-202244 (Gangtok Highway Helpline)
