2. Floods in Assam:

Assam is one of the most flood prone states in India. The State faces acute flood problem in the flood plains of the river Brahmaputra and Barak and other smaller river sub-basins. The extremely dynamic monsoon regime vis-à-vis the unique physiographic setting of the basin has been considered as the single most important cause for frequent occurrence of flood in this region. Historical analysis of the last thirteen years shows the problem of flood and its impact on the population every year.

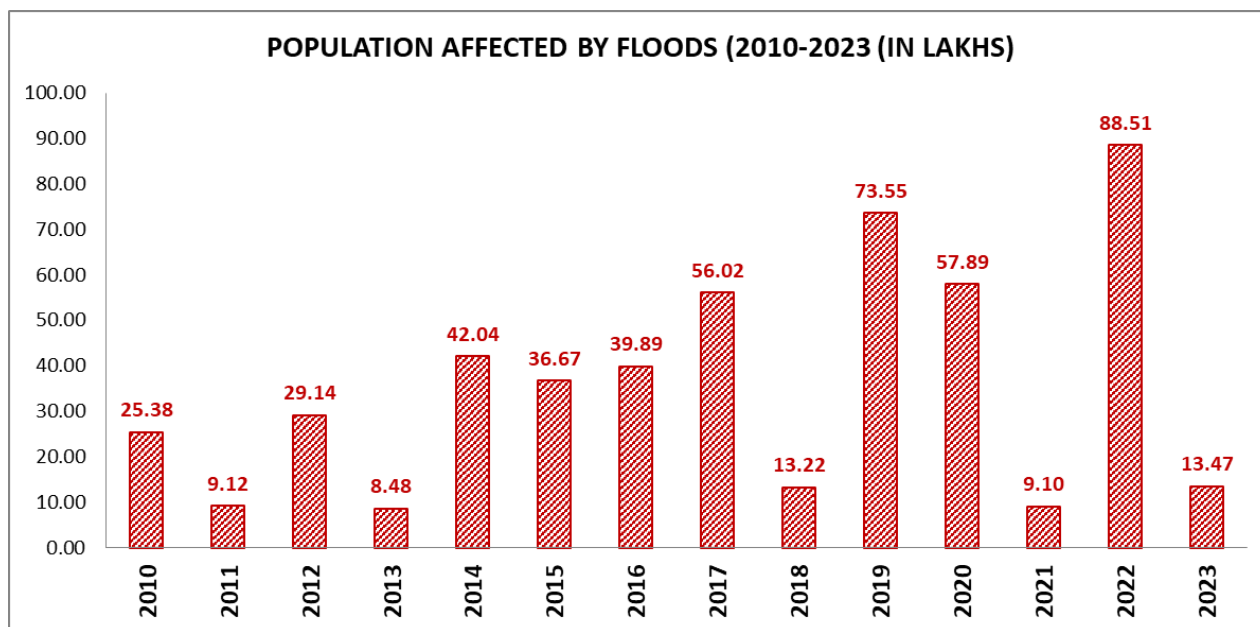

Figure 1: Graph showing Population Affected by Floods from 2010-2023

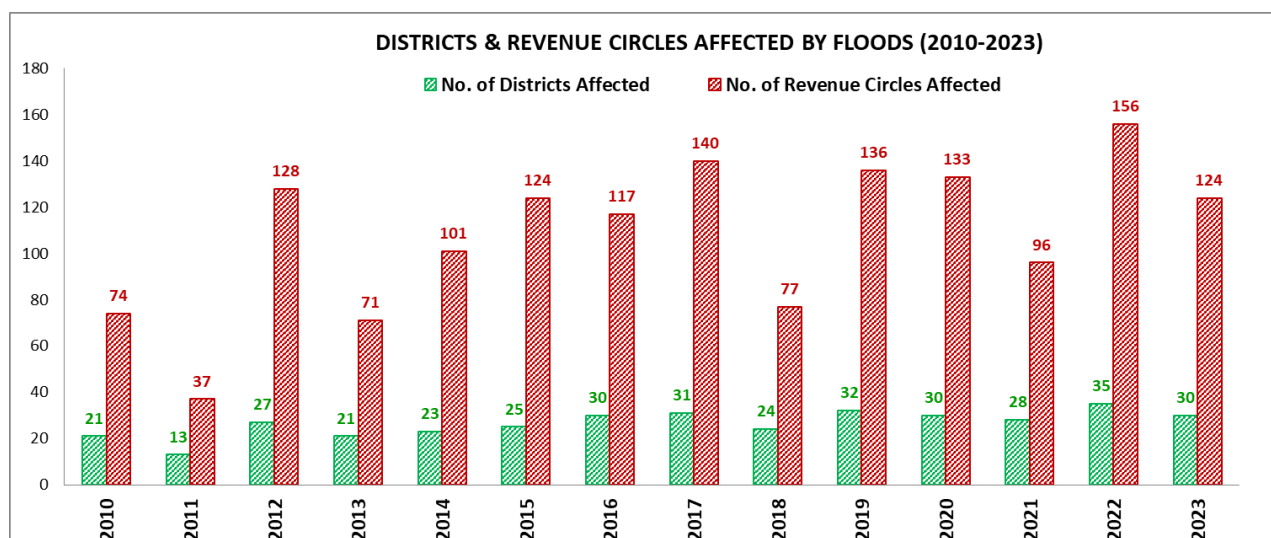

Figure 2: Graph showing Districts and Revenue Circles Affected by Floods from 2010-2023

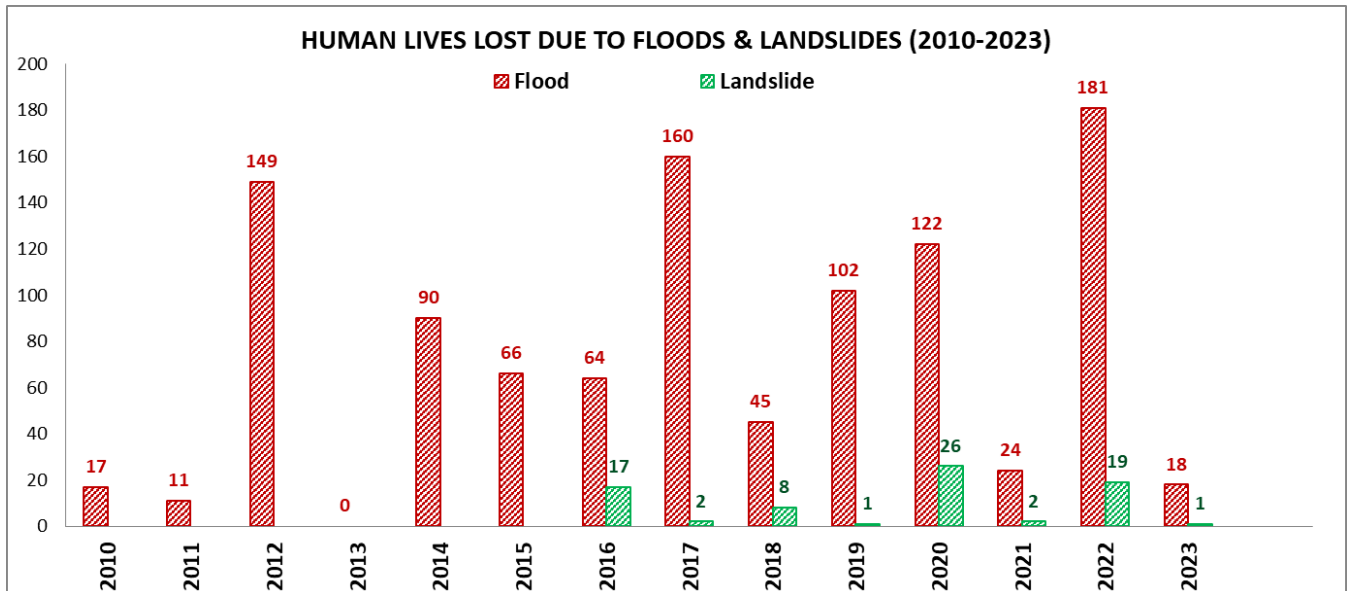

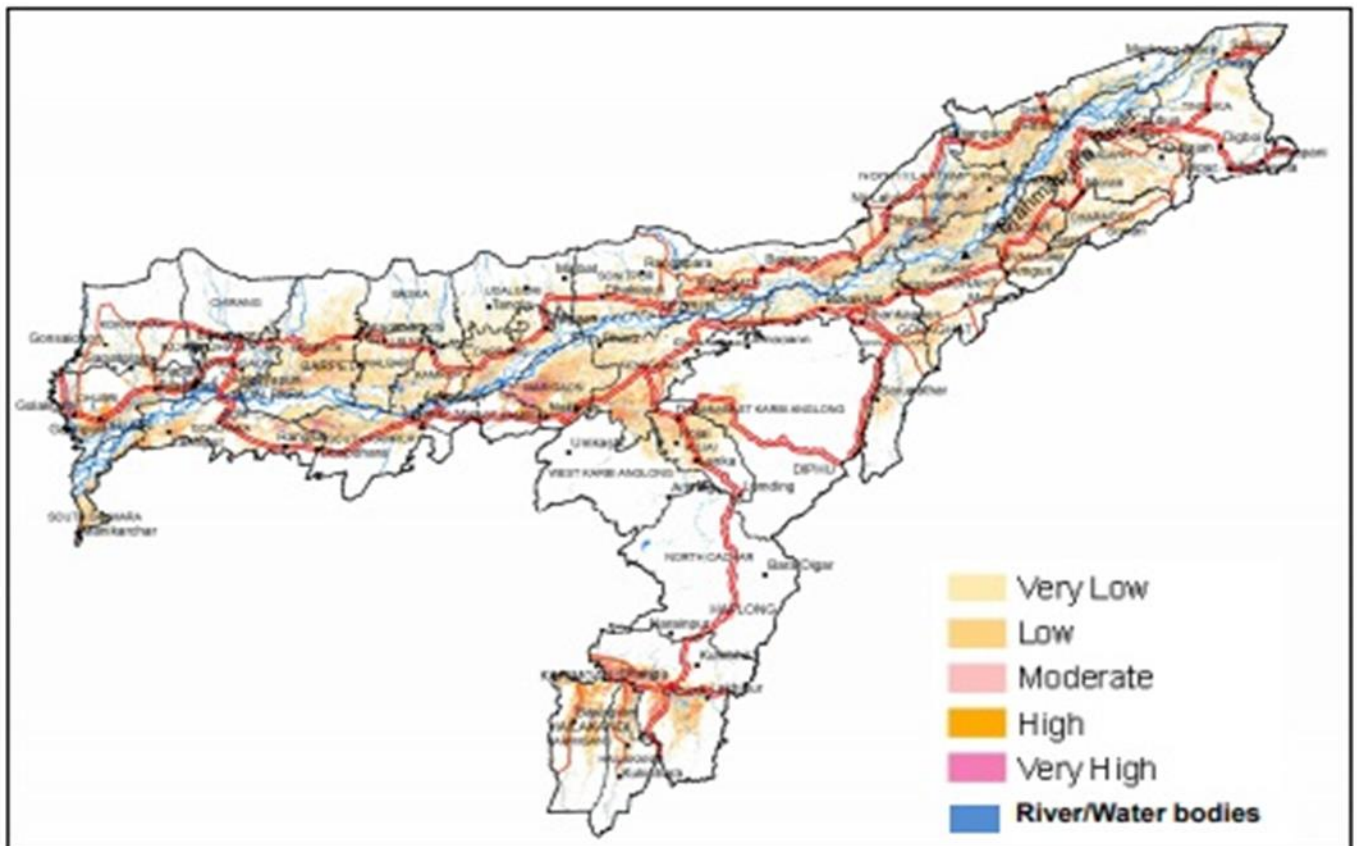

Figure 3: Graph showing Loss of Human Lives due to Floods and Landslides from 2010-2023

As per the Flood Hazard Atlas of Assam prepared by National Remote Sensing Centre (NRSC), Hyderabad using satellite data, about 28.75% (22.54 lakh hectares) of land in Assam state is affected by flood during 1998-2015.

The Brahmaputra River has a catchment area of 5, 80,000 Sq. km in Tibet, Bhutan, China, India and Bangladesh and in terms of discharge, is the third largest river in the world. Total length of Brahmaputra River is 2880 Km. The River flows for a length of 640 Km through the plains of Assam

(Tinsukia to Dhubri). In this valley, about 64 tributaries on its North bank and about 38 on its South bank join the river Brahmaputra. Total length of embankment in Assam is 2745 Km.

The river Barak is the second largest river in the North East. Originating from Nagaland and Manipur, it traverses a length of 225 Km in Assam and flows into Bangladesh. The total number of tributaries joining the Barak river within its Assam reach is around 10 and the number of sub tributaries joining the main tributaries is around 5. The catchment area of tributaries ranges between 300-4200 sq. km. and that of the sub tributaries ranges between 100- 2000 sq. km. Total length of embankment in Assam is 526 Km.

The extreme monsoon regime vis-à-vis the unique physiographic setting of the basin has been considered as the single most important cause for frequent occurrence of flood in this region. Besides, deforestation in the upstream areas lying in Arunachal Pradesh, Meghalaya, Nagaland, Mizoram, Manipur and Bhutan is resulting into excessive siltation and runoff, decreasing the carrying capacity of major rivers and tributaries.

Assam has approximately 5,000 Km of embankments constructed on the recommendation of Rashtriya Barh Aayog as short term measures in the decades of 1950s and 60s. The embankments have outlived their lives.

2.1 Assam Floods in 2023:

Assam State Disaster Management Authority (ASDMA) conducted six thematic meetings i.e. (i) Coordination for Response with responding agencies, (ii) Critical Infrastructure Preparedness, (iii) Ensuring continuity of services viz. Health, Water & Sanitation, Education, Social welfare services etc., (iv) Relief and Camp Management, (v) Risk communication and (vi) Reporting and Damage Assessment as part of its preparedness this year with various stakeholders. Besides, ASDMA also conducted Video conferencing with the DDMA's to review flood preparedness and the designated Nodal Officers from state HQs visited districts to review their flood preparedness at the district level.

In order to standardize the preparedness review mechanism, ASDMA had launched a system called "District Flood Preparedness Scorecard" based on a self – reporting mechanism where districts had reported their preparedness according to 11 (eleven) pre-defined minimum preparedness standards of action.

NDRF teams from 1st Bn. and 12th Bn. are prepositioned in nine strategic locations of the state of Assam for effective and prompt response during flood. Further, five companies of State Disaster Response Force (SDRF) were also deployed in 53 locations of Assam with boats and deep divers. Besides, ASDMA also deployed rescue boats and AAPDA Mitra volunteers. These proactive preparedness measures lead to substantive reduction of human lives lost and properties during the flood.

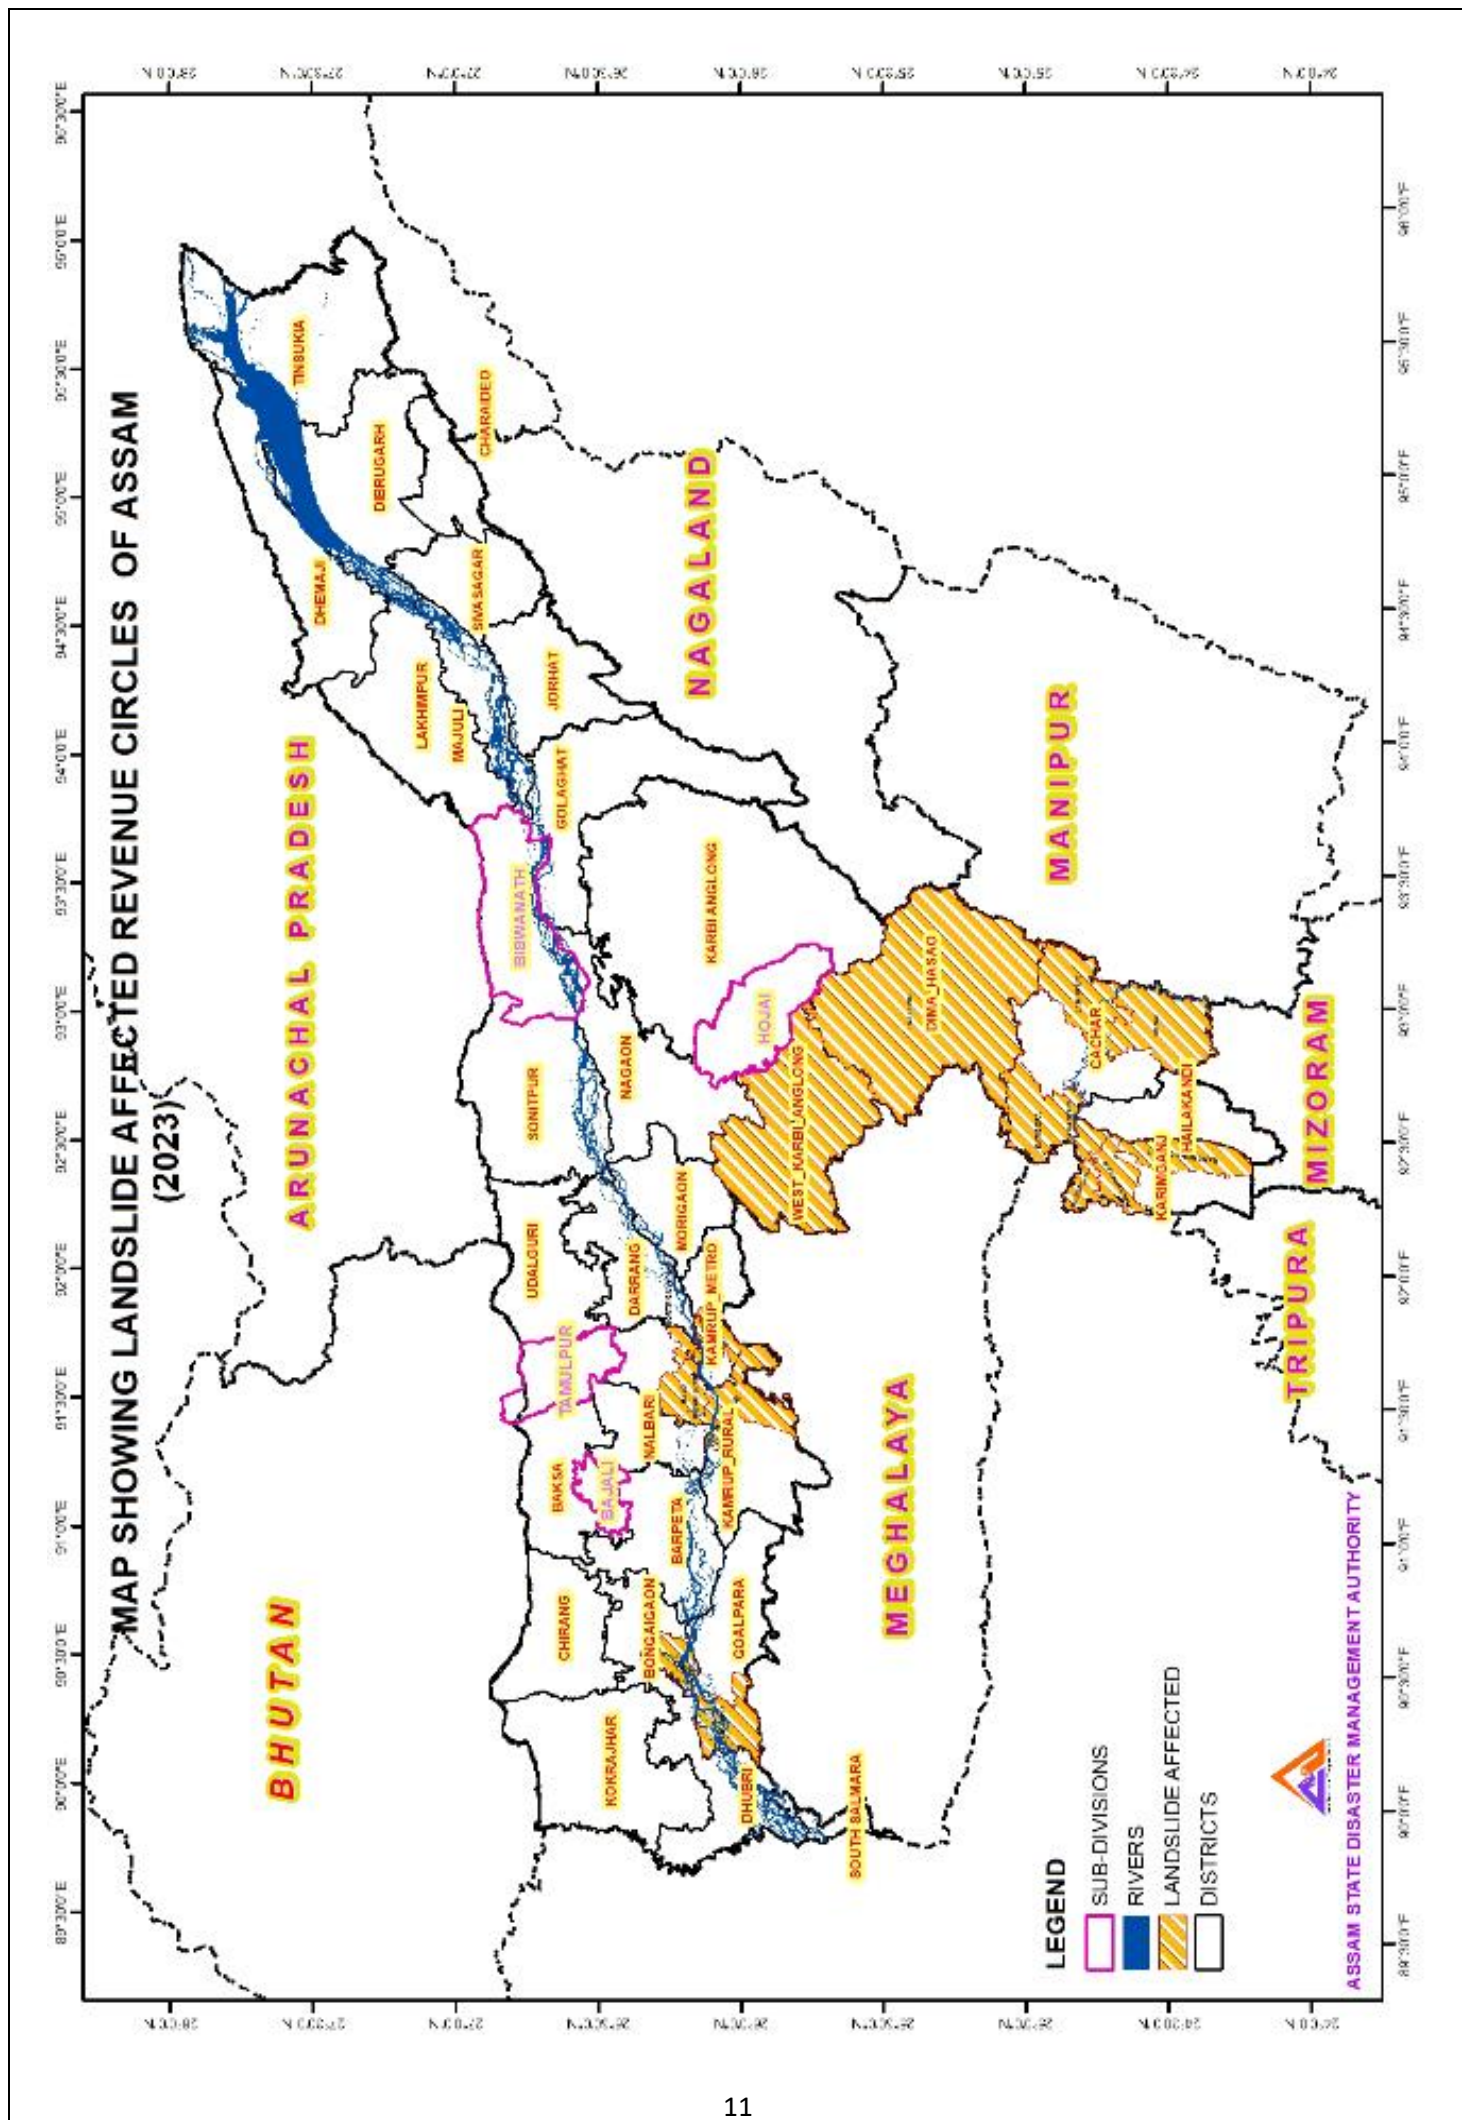

Further, ASDMA receives FLEWS (Flood Early Warning System) alerts from North Eastern Space Application Centre (NESAC) with 12 to 48 hrs lead time in the category of Low, Moderate, High and Very High and the alerts are disseminated to DDMA's, concerned authorities of the Govt. of Assam and other response agencies.

More than 4000 relief camps and shelter places were pre-identified during pre-monsoon period as a part of flood preparedness by DDMA's.

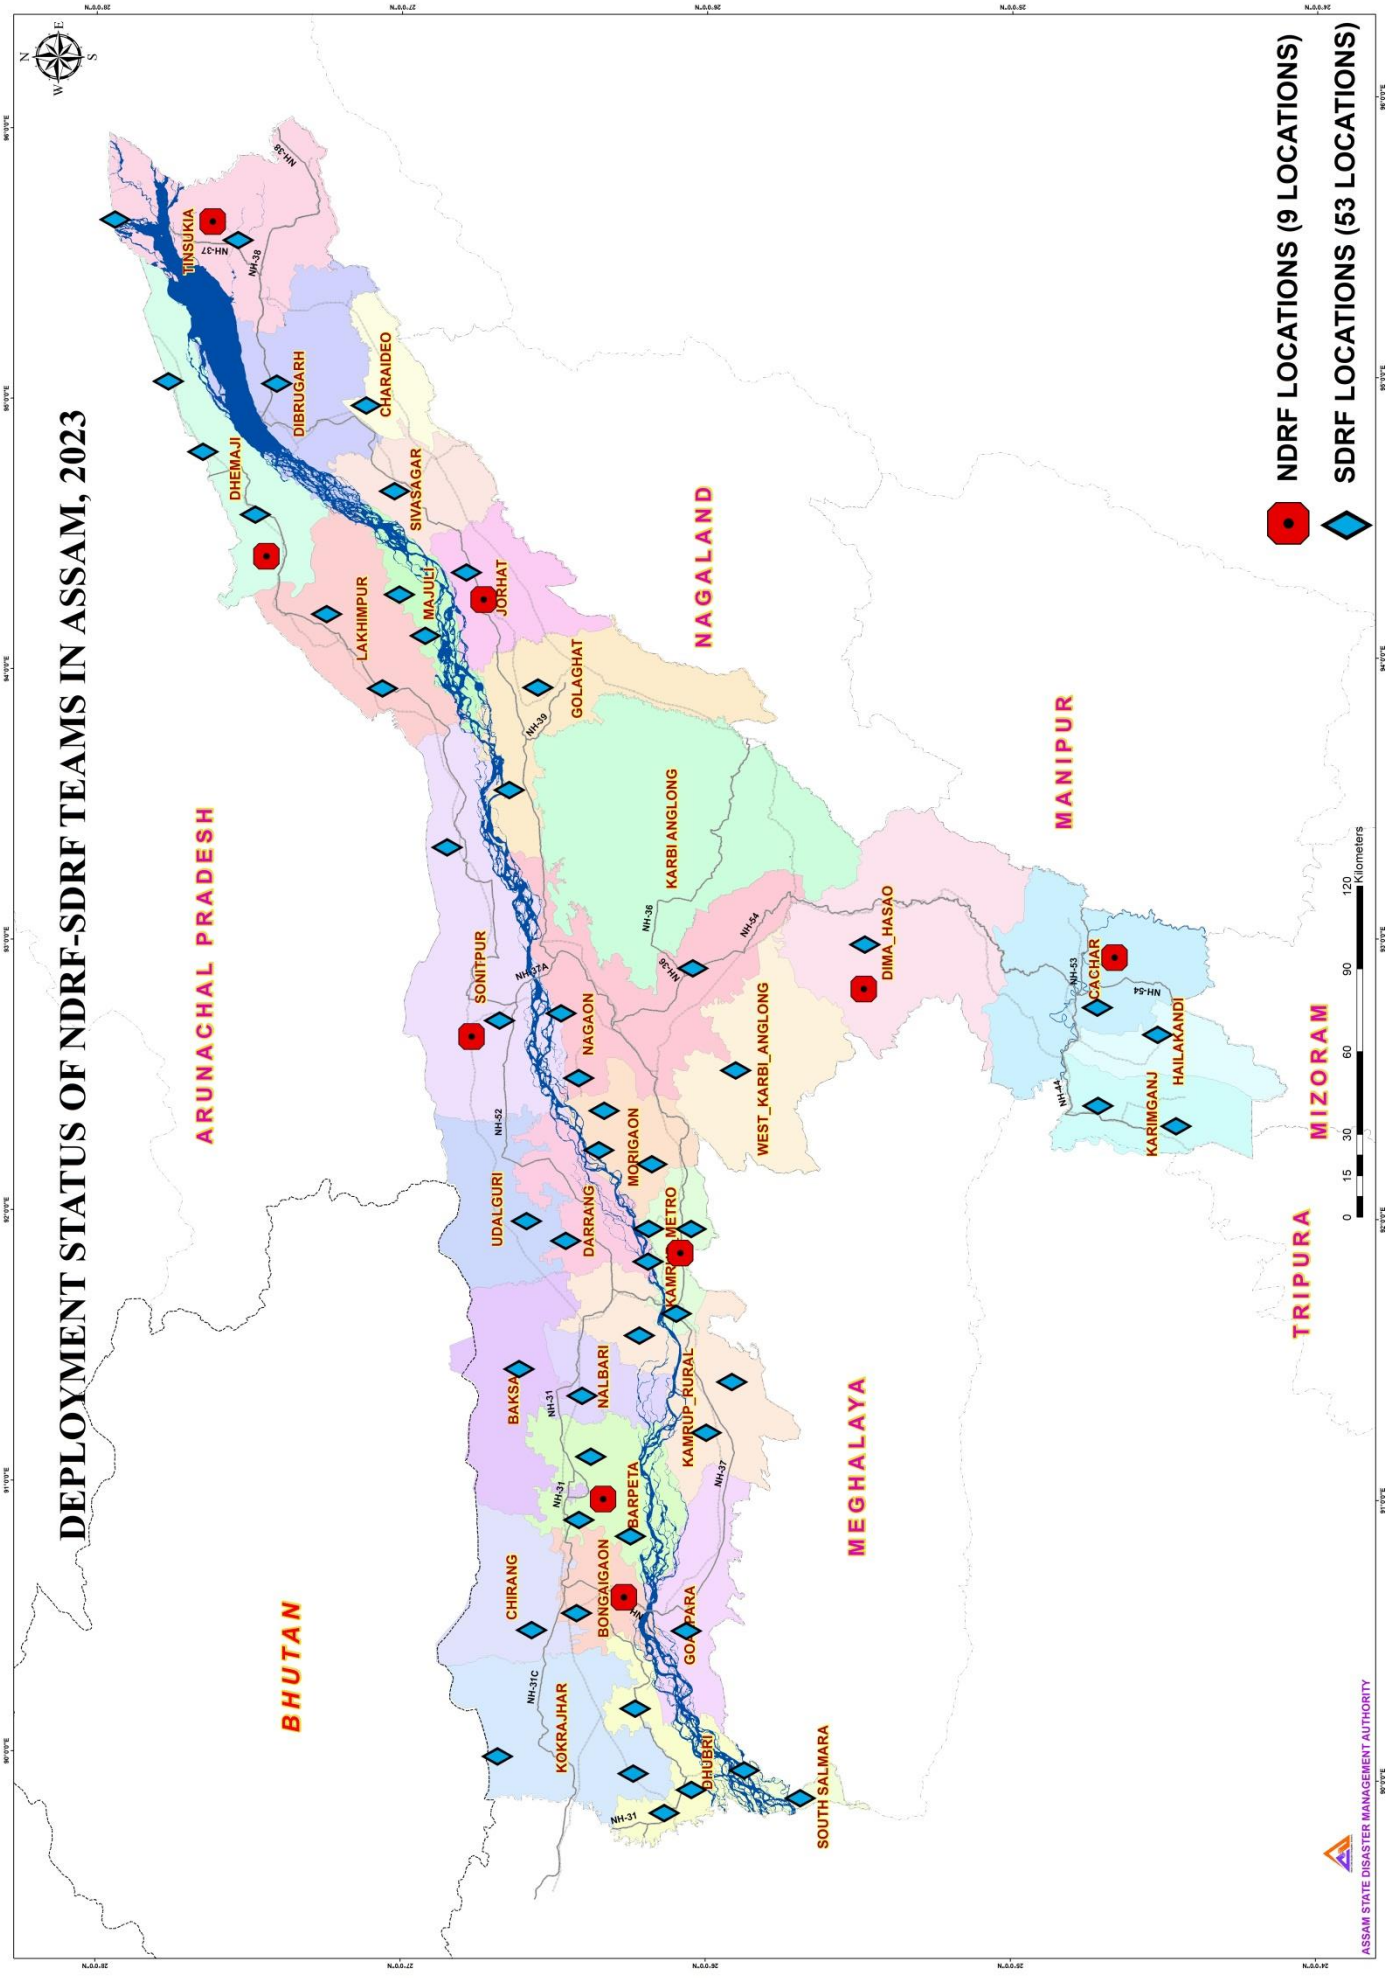

Assam has faced flood in the current year which had affected 30 districts, resulting in loss of human lives, livestock and large scale damage to the dwelling houses, standing crops, infrastructure like roads, bridges, embankments, schools, etc. Flood season starts in Assam from 1st May till 31st October every year and during the period ASDMA generates daily flood situation reports digitally through FRIMS (Flood Reporting and Information Management System). Each Revenue Circles of Assam submits online situation report through its respective DDMA's in the FRIMS portal. Following districts have been affected in flood this year viz. Bajali, Baksa, Barpeta, Biswanath, Bongaigaon, Cachar, Charaideo, Chirang, Darrang, Dhemaji, Dhubri, Dibrugarh, Goalpara, Golaghat, Hojai, Jorhat, Kamrup, Kamrup Metropolitan, Karimganj, Kokrajhar, Lakhimpur, Majuli, Morigaon, Nagaon, Nalbari, Sivasagar, Sonitpur, Tamulpur, Tinsukia, Udalguri.

2.5 REASONS FOR THE ASSAM FLOOD 2023:

- The State has a large network of rivers & tributaries originating from the Upper Catchments with high gradient.
- Flood occurred due to excessive rainfall in Assam and in the neighboring States. **Arunachal Pradesh, Meghalaya and Assam** recorded an excess rainfall with **36%, 107%** and **90% deviation** from the normal from 11th -22nd June, 2023 affecting a population of around 4.96 lakh.
- Further, excessive rainfall in Assam and in the neighboring States. **Arunachal Pradesh, Meghalaya and Assam** recorded an excess rainfall with **132%, 77%** and **67% deviation** from the normal from 22nd -28th August, 2023 which affected 22 districts along with a population of around 3.40 lakh on 30th August, 2023.
- Moreover, due to incessant rainfall in Bhutan and neighbouring states of Arunachal Pradesh, Nagaland along with release of water from Kurichhu Dam, Bhutan is another important cause for flooding affected 17 districts on 15th July, 2023.

2.8 Financial Assistance and GR Distribution to the Flood Affected People:

Government of Assam has carried out extensive relief operation in all the flood affected areas of the State. Food items like Rice, Dal, Salt, Mustard Oil, Baby Foods & Milk pouches, Chira, Gur, Packaged Food, safe drinking water etc. **(APPENDIX III)** have been distributed to the flood affected people who took shelter in the relief camps and through relief distribution points/centers along with cattle fodder/green grass for the livestock affected. Ex- Gratia has been distributed to the NOK of the deceased person. Necessary steps to ensure health and hygiene have also been undertaken. Medical teams were also deployed in the affected areas. Sanitary napkin and Baby food also included in GR materials.

2.9 Rescue Operations

Rescue operations were carried out by the various responding agencies namely NDRF, SDRF, Fire & Emergency Services, Civil Defence, SSB, Police, Local Administration, NGOs/ CBOs and trained volunteers in the affected districts during the flood. 1st Bn. and 12th Bn. NDRF teams were prepositioned in 09 locations across the State with rescue boats and SDRF personnel deployed in 53 locations of Assam. Revenue Circle Officials also used country boats mainly for transporting relief materials and rescuing animals in the affected village. Assam State Disaster Management Authority (ASDMA) had deployed 132 Inflatable Rubber Boats.

6.0 Conclusion:

Hon'ble Chief Minister of Assam reviewed the flood preparedness of the state on June 11th, 2023 and August 31st, 2023, involving various stakeholders, including state and central government departments, autonomous councils, and District Commissioners/ DDMA's of Assam. Hon'ble Chief Minister instructed all the Deputy Commissioners to establish effective coordination with NDRF and SDRF teams, to ensure a prompt response when required. Further, on June 17th, the Hon'ble Union Health Minister, Shri Mansukh L. Mandaviya, reviewed the flood preparedness of health systems in Assam with central agencies, along with state teams, namely the Department of Health & Family Welfare, Assam SDMA, and NHM Assam.

An Inter-Ministerial Central team also visited to the state of Assam w.e.f. 26th July to 29th July, 2023 to assess flood damages. The team visited 8 flood affected districts viz. Baksa, Nalbari, Barpeta, Chirang, Bajali, Biswanath, Lakhimpur and Dhemaji. The team witnessed the damages occurred during first wave of floods in the visited districts.

Based on the ground assessment by the District Administration/ District Disaster Management Authorities (DDMA's) and concerned line departments of the State Government, total requirement of funds covered under SDRF/NDRF, for rescue & relief operation (₹ 45.99 crores) + work other than rescue & relief operation (₹ 71.69 crores) = **₹ 117.68 crores** [in words Rupees one hundred seventeen crore sixty eight lakh only].

Government of India is therefore, requested to provide financial assistance of **₹ 117.68 crores** (in words Rupees one hundred seventeen crore sixty eight lakh only) out of NDRF and help the State to recover from the damages caused by the floods in 2023.
